## 1.0 Purpose of this document

This document provides an overview about the business need and the solution that can be provided to fulfil the objective.

## 2.0 Business Case

The evolution of the internet during the past two decades forced colleges and universities to rethink how they market to prospective students through their websites. They invest a lot of time & money in making their website look very attractive, but they rarely spend the same in building an internal portal for helping students to interact among themselves & to let them know about the clubs, services etc.

The solution developed will address the objective in a holistic manner and will have all the features and functionalities which shall support students and provide advocacy, events, clubs and services to enhance their experience at the University. This website is purely run by student's union independent of the institution. It will have search-able and browse-able Club catalogue for improved engagement and an events calendar to show upcoming events and track its footprints.

## 3.0 Technologies Recommended

Front End	.NET (HTML5, CSS3)
Middleware	.NET (ASP.net MVC, WEB API2)
Backend	Oracle/SQL Server

## 4.0 Hardware and Software Requirements

Technology	Hardware	Software
.NET	Desktop PC with 8GB RAM	1. Visual Studio 2015 2. SQL server 2014 3. Visual Studio Code

## 5.0 Terms and conditions
